## Important Health Warning About Playing Video Games

### Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these “photosensitive epileptic seizures” while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

The second is icons indicating the type of content in the game. Depending on the game, there may be a number of such icons. The age-rating of the game reflects the intensity of this content. The icons are:

# Advice

## *Combine Items to Solve Puzzles*

*Combining multiple items and using them together is sometimes the only way to solve certain puzzles. In cases like this, go to the item menu and use the Combine command. Select the items you want to combine and then choose the USE command.*

## *Pay Attention to the Main Character's Face Direction*

*As you move, the main character's face moves to look in a certain direction when he or she discovers items, doors, and save points. Sometimes this is the game's way of giving hints as to how to proceed, so pay close attention.*

## *Xbox LIVE*

*Xbox LIVE® is your connection to more games, more entertainment, more fun. Go to [www.xbox.com/live](http://www.xbox.com/live) to learn more.*

### *Connecting*

*Before you can use Xbox LIVE, connect your Xbox 360 console to a high-speed Internet connection and sign up to become an Xbox LIVE member. For more information about connecting, and to determine whether Xbox LIVE is available in your region, go to [www.xbox.com/live/countries](http://www.xbox.com/live/countries).*

### *Family Settings*

*These easy and flexible tools enable parents and caregivers to decide which games young game players can access based on the content rating. Parents can restrict access to mature-rated content. Approve who and how your family interacts with others online with the Xbox LIVE service, and set time limits on how long they can play. For more information, go to [www.xbox.com/familysettings](http://www.xbox.com/familysettings).*
